PROFESSIONAL SUMMARY

Senior Java Backend Engineer with 5+ years of experience building and integrating **enterprise-grade backend systems**, microservices, and distributed applications using **Java** and **Spring Boot**. Experienced in designing and implementing REST/SOAP APIs, **enterprise integration workflows**, and **API management solutions** across **healthcare, e-commerce, financial, and government** platforms. Strong hands-on experience with **Java Spring Boot**, Oracle SOA/BPEL, **Apigee**, relational **databases**, Redis, and production system troubleshooting, with a focus on scalable, reliable, and maintainable backend solutions.

WORK EXPERIENCE

Senior Software Engineer

Sep 2025 – Present

Nahdi Medical Co. | Riyadh, Saudi Arabia (Remote)

- Design and implement **enterprise integration solutions** connecting e-commerce, healthcare, supply-chain, payment, logistics, governmental, and internal distributed systems.
- Design and develop integration workflows using **Oracle SOA Suite, BPEL**, and **NXSD**, supporting both synchronous and asynchronous **REST/SOAP** communication.
- Delivered major marketplace integrations connecting Nahdi's e-commerce platform with **Amazon, Noon, and Trendyol**, as well as healthcare and logistics integration between **FarEye and the Home Healthcare platform**.
- Develop **Java/Spring Boot backend services** within the enterprise integration architecture, implementing APIs and integration-specific business logic while working with Oracle Database and Redis.
- Develop backend engineering solutions including **Redis caching, Swagger/OpenAPI-based API cataloging, and the Nahdi AI Chatbot**, alongside integrations with payment platforms such as **Checkout.com and PayFort**.
- Troubleshoot production integration issues, perform root-cause analysis, and participate in **solution design and architecture decisions** to improve system reliability and maintainability.

Senior Java Backend Developer

Aug 2024 – Sep 2025

GOSI – General Organization for Social Insurance | Riyadh, Saudi Arabia (Remote)

- Designed, developed, and deployed **Java/Spring Boot microservices** supporting secure government digital services within an enterprise distributed-system environment.
- Designed and integrated **Apigee API proxies** to securely expose backend services, manage API traffic, and support new service and feature rollouts.
- Led **requirements analysis and solution design** for a major enterprise system modernization initiative involving **Ministry of Commerce & Investment (MCI)** and **Government Service Bus (GSB)** systems within GOSI.
- Participated in **Program Increment (PI) planning**, collaborating with **business stakeholders and development teams** to define technical objectives, priorities, and delivery plans.
- Investigated and resolved **production issues through root-cause analysis** and debugging, contributing to the reliability and stability of production services.
- Developed unit tests using **JUnit/Mockito** to validate backend functionality and maintain code quality throughout development cycles.

Senior Java Backend Developer

Jun 2023 – Aug 2024

Cashcall – Digital Payment & Financial Solutions | Cairo, Egypt

- Architected and maintained **high-throughput payment microservices** handling real-time **digital wallet and transaction processing**.
- Led backend development efforts for core digital wallet and payment gateway features.
- Collaborated cross-functionally with frontend, QA, and product teams to deliver features on schedule.
- Implemented security best practices including OAuth2/JWT-based authentication and authorization.

Junior Full-Stack Developer

Aug 2022 – Jun 2023

Cashcall – Digital Payment & Financial Solutions | Cairo, Egypt

- Developed full-stack features using Java Spring Boot (backend) and Angular (frontend).
- Contributed to database design, REST API development, and integration testing.

Full-Stack Web Developer

Jan 2022 – Aug 2022

Upwork & Mostaq | Freelance / Remote

- Delivered end-to-end web development projects for clients across diverse industries.
- Built REST APIs, integrated third-party services, and deployed scalable solutions on cloud platforms.

TECHNICAL SKILLS

Core Backend	Java Spring Boot Spring MVC Spring Security Spring Cloud Spring JPA Hibernate
Microservice & Architecture	Microservices Distributed Systems REST APIs Event-Driven Architecture Kafka / Messaging
API & Integration	Apigee Oracle SOA Suite BPEL API Gateway
Databases	PostgreSQL MySQL Oracle MongoDB Redis SQL
DevOps & Tools	Git Jenkins Docker Linux CI/CD Splunk
Frontend	Angular TypeScript JavaScript HTML CSS Node.js Python
Practices	Agile / SAFe PI Planning TDD OAuth2 / JWT System Design Performance Optimization Scalability & Observability

KEY ACHIEVEMENTS

- Contributed to **modernization of government systems** (GOSI / MCI) using microservices architecture.
- Built **enterprise integration workflows** connecting multiple government and enterprise services.
- Developed **scalable payment backend services** supporting **digital wallet and financial transactions**.
- Mentored junior engineers and supported onboarding within agile development teams.

EDUCATION

Al-Azhar University, Faculty of Science

2017 – 2021

B.Sc. in Science – Cairo, Egypt

Overall Grade: Excellent with Honors | Rank: 1st in Class

Information Technology Institute (ITI)

Apr 2022 – Aug 2022

Software Development – Mansoura, Egypt

CERTIFICATIONS

Certified by ITI, NTI, Coursera, Udemy, and Udacity
